Government to Have More National Character, News-paper Says

LONDON, Aug. 16.—The Labor Sunday newspaper "People," published by Oswald Plessey, said yesterday that Prime Minister Chamberlain, during the parliamentary vacation, is preparing a complete reorganization of his cabinet.

The aim of the reorganization, said the article, would be:

- 1.—To give the government a more "national" character, in order to overcome the word of Great Britain's determination to defend her right.
- 2.—To allow Chamberlain to take control of foreign policy into his own hands.

The newspaper said Winston Churchill and David Lloyd George would be offered posts in the cabinet, without portfolio, and Anthony Eden would be replaced as foreign office head by Viscount Halifax, now lord president of the council, and a former Viceroy of India.

Lord Halifax, the paper stated, is well liked by Chamberlain, Hitler and may succeed in bringing the European nations closer.

The newspaper said would replace William, Ontario-Grey as colonial secretary. Sir John Simon, chairman of the Economic Warfare Council, Viscount Halifax as Lord Chamberlain, and Sir Samuel Hoare, home secretary, would take over the exchequer.

## Chinese Run Motor Buses On Peanut Oil

British United Press PEKIN, Aug. 16.—An historic motor caravanserai which carried Chinese officials from Nanking to distant Yunnan province, in addition to proving that China now has a network of modern highways, also served to compare the performance of buses operating on vegetable oil and charcoal.

Burning only vegetable oil, the whole 2,500 miles a China-made bus successfully negotiated the hard trip. Officials consider this significant since it proved that a cheap, native-made vegetable oil can be substituted for costly imported American and European petrol.

The buses got as much as eight miles to a gallon of vegetable oil, which is 50 per cent cheaper than petrol in China.

Vegetable kinds of vegetable oil were brought on the way. They were produced from peanuts, soy, rapeseed, cotton seed and castor-oil seeds.

Only two gallons of lubricating oil were used for the entire trip.
